

organic cotton from field to factory

the farm

No GMO Seeds

Organic cotton is grown from the original plant. Certified organic cotton is not grown from genetically modified seeds.

Soil is nurtured

Techniques such as soil rotation and composting is used. This makes it viable for long term use.

Saves water

Organic cotton uses less water, preserving a scarce and precious resource for the future.

Organic cotton uses up to 80% rainwater.

No hazardous chemical

Organic cotton is handpicked from fields that are free from chemicals. Protecting the health of farmers and the environment.

the factory

Factories are regularly inspected.

Dangerous chemicals are strictly prohibited.

Waste water is treated, protecting workers and our eco system.

Strict toxicity and biodegradable rules apply.

No forced labour.
No child labour.

you

Organic cotton is most skin friendly and a harmless natural fibre. Hypo allergenic, absorbent, soft and durable.

Certification of organic cotton is covered from the field to the shop.

By buying organic cotton products you can contribute to a sustainable lifestyle creating a happier and healthier planet for you and generations to come.
